

## Koukoi Games – Back-End Developer – Oulu, Finland

Koukoi Games is growing and looking for more great talent to join our team. We are looking for experienced, deeply motivated and passionate Back-End Developer to join our team at Koukoi Games. You want to be part of building high quality mobile games to serve rising needs of players, create long lasting memories, challenge yourself and enjoy working as a part of our awesome team – all this with entrepreneurial spirit, experience and passion for making games.

As a part of our team, you are responsible of developing our existing back-end environment and game titles further and take part in developing our upcoming titles – while always aiming higher. For being successful in Koukoi Games, you must be a good team player, have unique and productive approaches to programming and be in responsible of your own work. You like to face new challenges, have relaxed approach of getting things done with positive attitude, and you know how to focus on your work and make good development decisions.

As a Back-End Developer, with previous experience, you will have a portfolio of proven quality.

### RESPONSIBILITIES

- Back-end development and taking part in developing existing and upcoming F2P mobile games
- Understanding new technologies and technical challenges with mobile devices – finding unique approaches, with excellent problem solving skills, to take benefit of different technologies
- Being part of creating approachable and engaging mobile games
- Technical design, documentation, testing and supporting operations
- Being part of our awesome team

### REQUIREMENTS

- Highly experienced with Unity & C# programming, and understanding of integrations & 3D tools
- Experience with Linux, C/C++, Qt, PostgreSQL, Windows and Generic network programming
- Some experience with Binary streams & protocols, Valgrind, Hexadecimal, Other SQL, Linux sockets, Epoll & Poll & select, Multithreading, std::atomic, TCP & UDP and OpenSSL / similar
- Capable of independently developing and creating back-end environment & components, APIs, gameplay mechanics, in-game features, game prototypes, etc.
- Free-to-play, multiplayer and social game feature programming and know-how are big plusses
- Experience in taking part in QA and game testing activities
- Appropriate documentation and technical design skills
- Passion, pride and responsibility in your work
- Entrepreneurial attitude

### KOUKOI GAMES OFFERS

- New interesting challenges and approaches for making games with exceptional production value
- Relaxed working environment and flexible ways of working with best tools
- Opportunity to be part of an ice-cold focused team, our Koukoi family
- Interesting projects to take part in – from original titles to co-op with entertainment companies
- Opportunity to learn and grow, and responsibility and compensation

Interested? Please drop us your application including CV, cover letter and portfolio at [info@koukoi.com](mailto:info@koukoi.com) with the subject “Back-End Developer”. Even if your skillset is not the right match for our requirements, we still want to know about all super skilled game developers there are, so please drop us a line.
